

CASE STUDY

STORM READINESS AND RESPONSE

Storm Readiness & Response

Hurricane Milton made landfall in Siesta Key, Florida in Sarasota County on the evening of October 9, 2024 as a major Category 3 hurricane with maximum sustained winds of 120 mph. Milton became the ninth hurricane and the second Category 5 hurricane, after Hurricane Beryl, of the 2024 Atlantic hurricane season. It was one of the most intense hurricanes on record in the Atlantic basin overall.

Before

After

Planning is Key

Damage Assessment

We are generally mobilized within proximity of anticipated impact areas, with secondary teams ready to respond to unexpected damage outside of storm forecasts.

Crew Deployment

Our crews are trained and our fleets are prepared with the right engineering and fabrication equipment for onsite readiness. Our print teams have pro-active plans for materials and routing.

Fast Turn-Around

We know that keeping your presence well lit, safe, and operational to respond to community petroleum, and other needs, is critical to your best practices and services.

Timing is Everything

When it comes to storm and emergency response, we are pro-active with our "readiness and response" approach.

Planning

We help your company plan accordingly to prep for storm or unforeseen damage to your site.

Smart Crews

Our crews have great insight to the needs from serious damage in an emergency situation. We remain "in the ready" to respond.

Exceptional Support

Our teams remain dedicated to communications; while keeping your site and overall operations teams current with up-to-date assessment and project timelines.
